## PROJECTS

**Restaurant Website** | [HTML](#), [CSS](#), [JavaScript](#), [API](#)

2025

- Developed a dynamic restaurant website featuring responsive login, sign-up, order tracking, various order methods, cart, order filtering, and a game in the offer page.
- Implemented dynamic animations and content rendering for enhanced user interactions.
- Designed with a focus on user experience, responsive design, and modern aesthetics.
- Created for the second round of the Reimagine Hackathon.

**Currency Converter** | [HTML](#), [CSS](#), [JavaScript](#), [API](#)

2025

- \* Developed a web application that converts currency values based on real-time exchange rates.
- \* Integrated a third-party API to fetch the latest exchange rates for various currencies.
- \* Implemented a user-friendly interface for easy input and conversion of currency values.

## FRESHER'S

I am Subhadarsini Gahan, currently pursuing my studies at GITA College. As a passionate Python Developer, I am enthusiastic about solving complex problems and building efficient applications. I have a strong foundation in Python, C, Java, Cloud Computing, HTML, CSS, and JavaScript.

I am eager to deepen my expertise in backend development, data structures, and algorithms, while also exploring frameworks like Django and Flask. I am seeking opportunities to work on innovative projects and collaborate with like-minded professionals. My goal is to leverage my programming skills to develop scalable and impactful software solutions.

## TECHNICAL SKILLS

**Languages:** C, Java, Python

## COMMUNICATION SKILLS

**Languages:** English, Hindi, Odia

## HOBBIES

Traveling and Singing.
